Tasker JT4-082-90 (27 Jul 90) SG1A

Target: Unidentified compound at [REDACTED]

EEI:

1. Describe the compound in detail.
2. What is the purpose of the compound?
3. What people/group is associated with the compound?
4. Provide any other information available.

Feedback for JT4-082-90 (27 Jul 90)

00B: (271043 JUL 90) 00B accurately described the area shown in photo for previous target before seeing background information indicating the target to be the same shown in the photo. No further descriptions were pursued. There are indications of a large, wood-frame house nearby (not shown in photo) being connected to operations at this site, as well as a small trailer with a fenced off section which appears to be for children. There are long, oblong, hollowed-out "things" lying on the ground, and an evenly spaced row of structures which have wrinkled tops and sides. This compound provides seclusion, safety, and access. There was an impression of military involvement (not U.S. military), and resulting purposes of both harassment and denial (NFI). The purpose of the compound is for loading/transferring drugs (mainly marijuana) and other goods to small boats for transfer to larger boats. There is also a small, hidden "piped" facility for the transfer of liquid goods. 00B felt that the compound may have some attachment to the Medallin Cartel, but had no definite proof for this supposition.

00D: 271450L July 90

The main compound is located on the east side of the waterway, by the road. The main activity at this compound is processing drugs for transhipment and transhipment. Most of the drug activity is Marijuana. However, there is some cocaine processing as well. There are indications that these people have weapons.

The activity by the road has people packing up and moving/loading boxes or containers. Drug activity is marijuana. There are at least two cayucos nearby that are going downriver. Toward the wider part of the river, north of the road, there is marijuana activity. People are rolling up bundles of green stuff on rows of little tables.

Toward the narrow part of the river, south of the road, there is cocaine activity hidden under the trees. This activity deals with mixing a pasty substance. There is a very strong smell here.

00F: (271130L JUL 90) The target consists of a number of structures. There is one area where the structures are used for storage and/or habitation. There is a sense that several of them have thatched roofs and are situated at right angles to one another. One of these structures is used for radio communication and another is associated with the security of the compound. There is an open area where stacks of crates are located as well as scattered oil drums. There are periods of time at the site when a lot of crates, boxes, boxes and overall activity is present. These periods alternate with times where the area is virtually abandoned of materiel, people and activity(ies). The site is concerned with movement and transferring a lot of items/objects. There are two or three vehicles present and parked in a somewhat haphazard manner.
